

A table with a pink background, divided into two rows and four columns. The columns are separated by vertical lines in yellow, blue, and orange. A horizontal black line separates the two rows. A small grey vertical bar is on the far right. The text '1: Patbob_53' is located in the bottom-left corner.

1: Patbob_53

A table with a pink background, divided into two rows and two columns. The columns are separated by vertical lines in yellow and brown. A horizontal black line separates the two rows. The text '2: Phrampa_49' is located in the bottom-left corner.

2: Phrampa_49

Note: Tracks are now grouped by subcluster and scaled. Switching in subcluster is indicated by changes in track color. Track scale is now set by default to display the region 30 bp upstream of start 1 to 30 bp downstream of the last possible start. If this default region is judged to be packed too tightly with annotated starts, the track will be further scaled to only show that region of the ORF with annotated starts. This action will be indicated by adding "Zoomed" to the title. For starts, yellow indicates the location of called starts comprised solely of Glimmer/GeneMark auto-annotations, green indicates the location of called starts with at least 1 manual gene annotation.

Pham 136843 Report

This analysis was run 11/02/24 on database version 579.

Pham number 136843 has 2 members, 2 are drafts.

Phages represented in each track:

- Track 1 : Patbob_53
- Track 2 : Phrampa_49

Summary of Final Annotations (See graph section above for start numbers):

This pham is comprised of all draft annotations. There are no annotations to summarize.

Summary by start number:

Start 1:

- Found in 1 of 2 (50.0%) of genes in pham
- No Manual Annotations of this start.
- Called 100.0% of time when present
- Phage (with cluster) where this start called: Patbob_53 (FC),

Start 2:

- Found in 1 of 2 (50.0%) of genes in pham
- No Manual Annotations of this start.
- Called 100.0% of time when present
- Phage (with cluster) where this start called: Phrampa_49 (FC),

Summary by clusters:

There is one cluster represented in this pham: FC

Gene Information:

Gene: Patbob_53 Start: 23779, Stop: 24093, Start Num: 1

Candidate Starts for Patbob_53:

(1, 23779), (3, 23959), (4, 24007),

Gene: Phrampa_49 Start: 21057, Stop: 21368, Start Num: 2

Candidate Starts for Phrampa_49:
(2, 21057), (5, 21342),
