

## Pham 15550

1: BirthdayBoy\_43

2: Lila22\_43

A diagram showing a 2x5 grid of pink rectangles. A vertical green line is positioned between the fourth and fifth columns. A mouse cursor is at the top of the green line. The text "4: Ranch\_42" is at the bottom left.

Note: Tracks are now grouped by subcluster and scaled. Switching in subcluster is indicated by changes in track color. Track scale is now set by default to display the region 30 bp upstream of start 1 to 30 bp downstream of the last possible start. If this default region is judged to be packed too tightly with annotated starts, the track will be further scaled to only show that region of the ORF with annotated starts. This action will be indicated by adding "Zoomed" to the title. For starts, yellow indicates the location of called starts comprised solely of Glimmer/GeneMark auto-annotations, green indicates the location of called starts with at least 1 manual gene annotation.
