

The image shows a large pink rectangular area, possibly a placeholder or a redacted section. A horizontal black line divides the pink area into two equal vertical sections. On the left side, there are six vertical lines of different colors, labeled 1 through 6 from left to right. The labels are positioned at the top of each line. The colors of the lines are: 1 (purple), 2 (yellow), 3 (light blue), 4 (orange), 5 (tan), and 6 (dark red).

Note: Tracks are now grouped by subcluster and scaled. Switching in subcluster is indicated by changes in track color. Track scale is now set by default to display the region 30 bp upstream of start 1 to 30 bp downstream of the last possible start. If this default region is judged to be packed too tightly with annotated starts, the track will be further scaled to only show that region of the ORF with annotated starts. This action will be indicated by adding "Zoomed" to the title. For starts, yellow indicates the location of called starts comprised solely of Glimmer/GeneMark auto-annotations, green indicates the location of called starts with at least 1 manual gene annotation.
