

Diagram illustrating a 2D coordinate system with a grid of 12 rectangular regions. The regions are labeled with numbers 1 through 12 in the top-left corner. The grid is defined by a horizontal line at y=3 and a vertical line at x=3. The regions are colored in a repeating pattern: light pink, light blue, light green, and light orange.

Note: Tracks are now grouped by subcluster and scaled. Switching in subcluster is indicated by changes in track color. Track scale is now set by default to display the region 30 bp upstream of start 1 to 30 bp downstream of the last possible start. If this default region is judged to be packed too tightly with annotated starts, the track will be further scaled to only show that region of the ORF with annotated starts. This action will be indicated by adding "Zoomed" to the title. For starts, yellow indicates the location of called starts comprised solely of Glimmer/GeneMark auto-annotations, green indicates the location of called starts with at least 1 manual gene annotation.
