

A diagram consisting of a 2x5 grid of pink rectangular cells. A horizontal black line runs across the middle of the grid, separating the top and bottom rows. Four vertical lines of different colors are positioned between the columns: a thick green line between the first and second columns, a thin red line between the second and third columns, a thin light blue line between the third and fourth columns, and a thin orange line between the fourth and fifth columns. Each vertical line has a small black arrowhead pointing upwards at its top end. In the bottom-left corner of the grid, there is a small grey text label: "1: BigSherm_3 + 1".

1: BigSherm_3 + 1

Note: Tracks are now grouped by subcluster and scaled. Switching in subcluster is indicated by changes in track color. Track scale is now set by default to display the region 30 bp upstream of start 1 to 30 bp downstream of the last possible start. If this default region is judged to be packed too tightly with annotated starts, the track will be further scaled to only show that region of the ORF with annotated starts. This action will be indicated by adding "Zoomed" to the title. For starts, yellow indicates the location of called starts comprised solely of Glimmer/GeneMark auto-annotations, green indicates the location of called starts with at least 1 manual gene annotation.

Pham 222613 Report

This analysis was run 06/08/26 on database version 649.

Pham number 222613 has 2 members, 0 are drafts.

Phages represented in each track:

- Track 1 : BigSherm_3, QuinnAvery_3

Summary of Final Annotations (See graph section above for start numbers):

The start number called the most often in the published annotations is 1, it was called in 2 of the 2 non-draft genes in the pham.

Genes that call this "Most Annotated" start:

- BigSherm_3, QuinnAvery_3,

Genes that have the "Most Annotated" start but do not call it:

-

Genes that do not have the "Most Annotated" start:

-

Summary by start number:

Start 1:

- Found in 2 of 2 (100.0%) of genes in pham
- Manual Annotations of this start: 2 of 2
- Called 100.0% of time when present
- Phage (with cluster) where this start called: BigSherm_3 (FF), QuinnAvery_3 (FF),

Summary by clusters:

There is one cluster represented in this pham: FF

Info for manual annotations of cluster FF:

- Start number 1 was manually annotated 2 times for cluster FF.

Gene Information:

Gene: BigSherm_3 Start: 695, Stop: 826, Start Num: 1
Candidate Starts for BigSherm_3:
(Start: 1 @695 has 2 MA's), (2, 722), (3, 749), (4, 800),

Gene: QuinnAvery_3 Start: 695, Stop: 826, Start Num: 1
Candidate Starts for QuinnAvery_3:
(Start: 1 @695 has 2 MA's), (2, 722), (3, 749), (4, 800),
