

A 2x5 grid of pink cells. The grid is divided into two rows and five columns. Vertical lines separate the columns. The top row has labels 1, 2, 3, 4, and 5 above the columns. The bottom row is empty. The label '1: Exile_55' is located in the bottom-left corner of the grid.

A 2x5 grid of light purple cells. The grid is divided into two rows and five columns. Vertical lines separate the columns. The top row has labels 1, 2, and 3 above the first three columns. The bottom row is empty. The label '2: Jankie_57 + 1' is located in the bottom-left corner of the grid.

Note: Tracks are now grouped by subcluster and scaled. Switching in subcluster is indicated by changes in track color. Track scale is now set by default to display the region 30 bp upstream of start 1 to 30 bp downstream of the last possible start. If this default region is judged to be packed too tightly with annotated starts, the track will be further scaled to only show that region of the ORF with annotated starts. This action will be indicated by adding "Zoomed" to the title. For starts, yellow indicates the location of called starts comprised solely of Glimmer/GeneMark auto-annotations, green indicates the location of called starts with at least 1 manual gene annotation.
