

A 2x5 grid of pink cells. The grid is defined by a horizontal line and a vertical line on the right. Five vertical lines of different colors divide the grid into five columns: purple, red, green, orange, and grey. The labels 1 through 5 are positioned above the top edge of the grid, corresponding to the columns.

1: Bilo_30

A 2x2 grid. The left half of the grid is light grey, and the right half is pink. A vertical green line separates the two halves. A horizontal line divides the grid into two rows. The label 2 is positioned above the top edge of the pink section.

2: Ditters_31

Note: Tracks are now grouped by subcluster and scaled. Switching in subcluster is indicated by changes in track color. Track scale is now set by default to display the region 30 bp upstream of start 1 to 30 bp downstream of the last possible start. If this default region is judged to be packed too tightly with annotated starts, the track will be further scaled to only show that region of the ORF with annotated starts. This action will be indicated by adding "Zoomed" to the title. For starts, yellow indicates the location of called starts comprised solely of Glimmer/GeneMark auto-annotations, green indicates the location of called starts with at least 1 manual gene annotation.

Pham 295767 Report

This analysis was run 04/18/26 on database version 643.

Pham number 295767 has 2 members, 0 are drafts.

Phages represented in each track:

- Track 1 : Bilo_30
- Track 2 : Ditters_31

Summary of Final Annotations (See graph section above for start numbers):

The start number called the most often in the published annotations is 3, it was called in 2 of the 2 non-draft genes in the pham.

Genes that call this "Most Annotated" start:

- Bilo_30, Ditters_31,

Genes that have the "Most Annotated" start but do not call it:

-

Genes that do not have the "Most Annotated" start:

-

Summary by start number:

Start 3:

- Found in 2 of 2 (100.0%) of genes in pham
- Manual Annotations of this start: 2 of 2
- Called 100.0% of time when present
- Phage (with cluster) where this start called: Bilo_30 (BI2), Ditters_31 (BI2),

Summary by clusters:

There is one cluster represented in this pham: BI2

Info for manual annotations of cluster BI2:

- Start number 3 was manually annotated 2 times for cluster BI2.

Gene Information:

Gene: Bilo_30 Start: 24803, Stop: 24991, Start Num: 3

Candidate Starts for Bilo_30:

(1, 24671), (2, 24755), (Start: 3 @24803 has 2 MA's), (4, 24878), (5, 24896),

Gene: Ditters_31 Start: 25073, Stop: 25270, Start Num: 3

Candidate Starts for Ditters_31:

(Start: 3 @25073 has 2 MA's),
